

ANALYZING THE IMPACT OF CAR FEATURES ON PRICE AND PROFITABILITY

Project Description

This project aims to analyze the impact of various car features on their pricing and profitability to help a car manufacturer optimize pricing and product development decisions. By understanding the factors that drive consumer demand and how different features correlate with a car's price and popularity, the manufacturer can make informed decisions to maximize profitability while meeting consumer preferences.

Business Problem

The key question is how a car manufacturer can optimize pricing and product development decisions to maximize profitability while meeting consumer demand.

Tech-Stack Used:

- **Microsoft Excel:** For data cleaning, analysis, visualization, and dashboard creation. Excel is a powerful tool for data analysis with robust features for visualization and statistical analysis.

Approach

1. **Descriptive Statistics:** To summarize the basic features of the dataset, providing a foundation for understanding the data.
2. **Visualization:** To uncover trends and relationships between variables, helping to identify patterns and trends.
3. **Regression Analysis:** To quantify the relationship between car features and prices, identifying the factors that most influence car prices.
4. **Market Segmentation:** To group cars into categories based on their features and market categories, aiding in understanding consumer preferences across different segments.

ANALYSIS

TASK 1

How does the popularity of a car model vary across different market categories?

1A

MARKET CATEGORY	COUNTA OF MARKET CATEGORY	AVERAGE OF POPULARITY
Crossover	1075	1556.17
Crossover, Diesel	7	873.00
Crossover, Exotic, Luxury, High-Performance	1	238.00
Crossover, Exotic, Luxury, Performance	1	238.00
Crossover, Factory Tuner, Luxury, High-Performance	26	1823.46
Crossover, Factory Tuner,Luxury,Performance	5	2607.40
Crossover,Factory Tuner,Performance	4	210.00
Crossover,Flex Fuel	64	2073.75
Crossover,Flex Fuel,Luxury	10	1173.20

Flex Fuel, Diesel,
Hatchback, Crossover,
Performance are the most
popular market category
for car models.

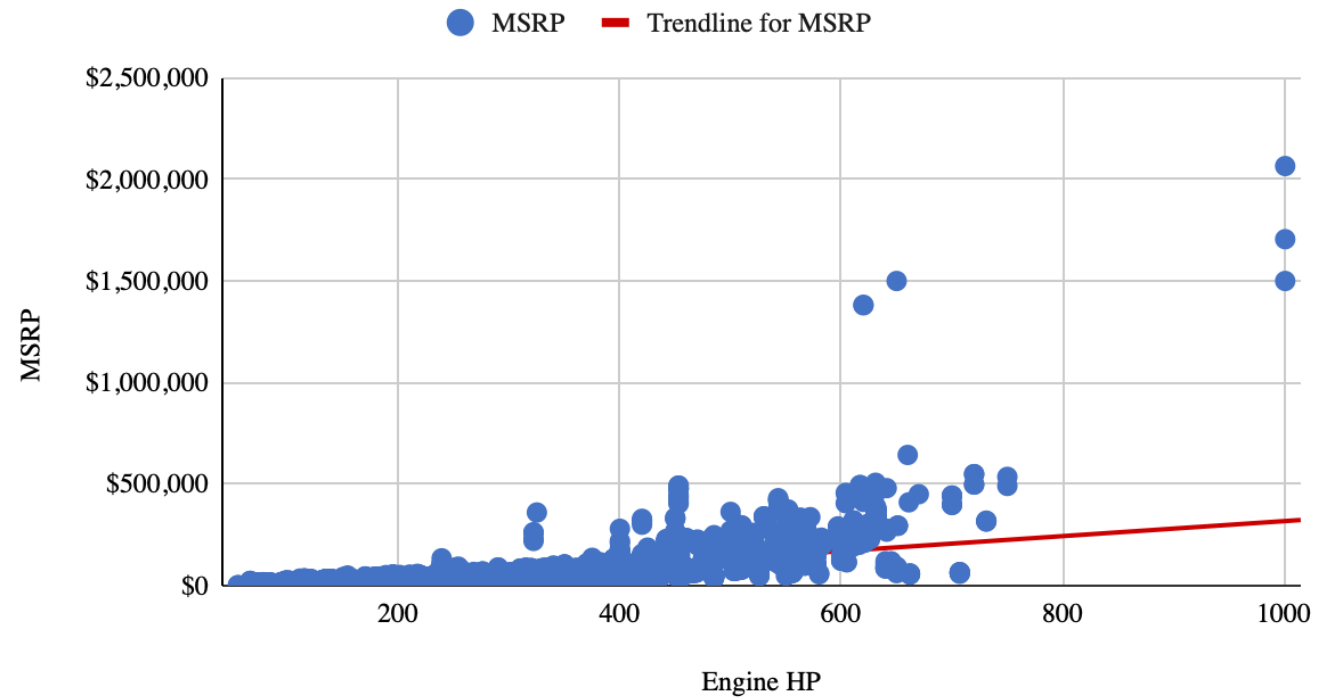

TASK 2

What is the relationship between a car's engine power and its price?

2

If engine power increases, the price will also increase, indicating a positive relationship between the two.

MSRP vs. Engine HP

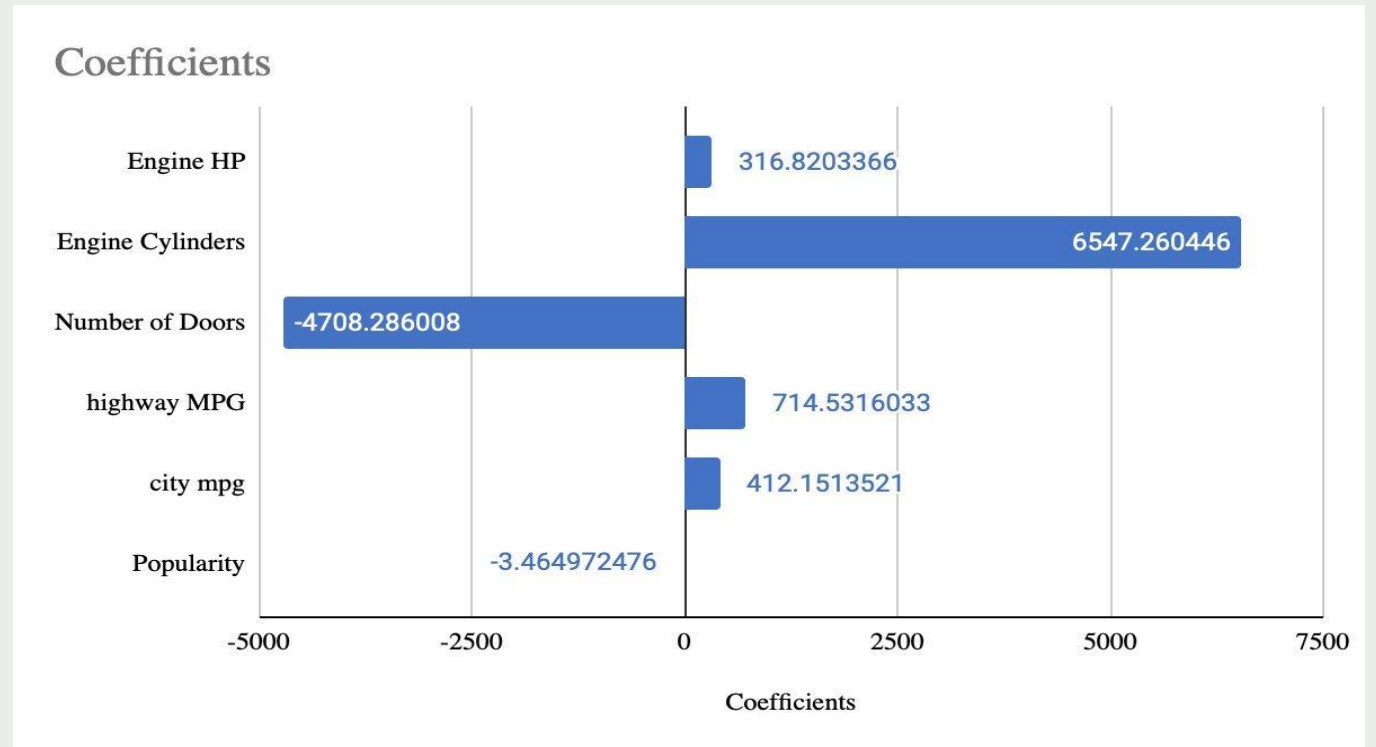

TASK 3

Which car features are most important in determining a car's price?

3

The number of engine cylinders is the most important factor in determining a car's price.

TASK 4

How does the average price of a car vary across different manufacturers?

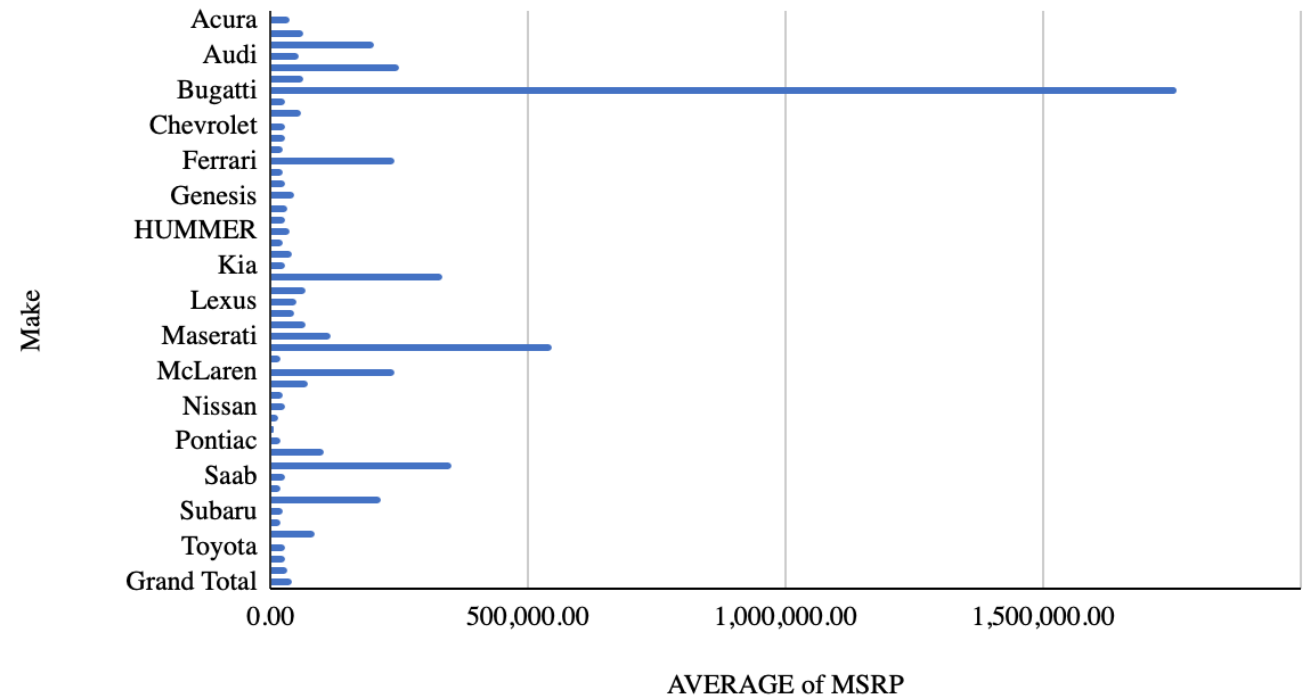

4A

<i>Make</i>	AVERAGE of MSRP
Acura	35,087.49
Alfa Romeo	61,600.00
Aston Martin	198,123.46
Audi	54,574.12
Bentley	247,169.32
BMW	62,162.56
Bugatti	1,757,223.67
Buick	29,034.19
Cadillac	56,368.27

4B

Bugatti has the highest average price, whereas Plymouth has the lowest.

AVERAGE of MSRP vs. Make

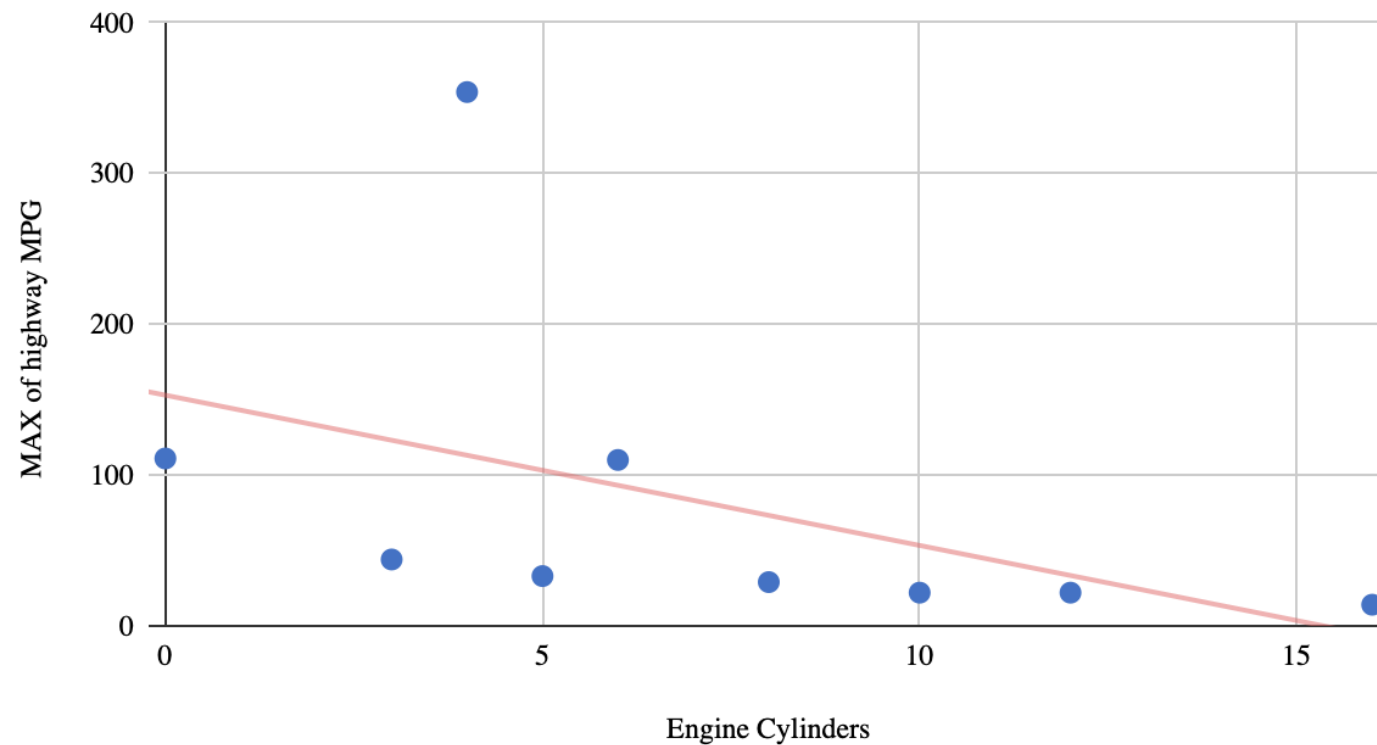

TASK 5

What is the relationship between fuel efficiency and the number of cylinders in a car's engine?

5A

Engine Cylinders	Highway MPG
0	111
3	44
4	354
5	33
6	110
8	29
10	22
12	22
16	14

highway MPG vs. Engine Cylinders

5B

An increase in the number of cylinders leads to a decrease in highway MPG, reflecting a negative relationship between the two.

Correlation:

Using Formula-

=CORREL(A2:A11200, B2:B11200)

-0.5962460188

BUILDING THE DASHBOARD

TASK 1

How does the distribution of car prices vary by brand and body style?

Task1

TASK 2

Which car brands have the highest and lowest average MSRPs, and how does this vary by body style?

Task2

TASK 3

How do the different feature such as transmission type affect the MSRP, and how does this vary by body style?

Task3

TASK 4

How does the fuel efficiency of cars vary across different body styles and model years?

Task4

TASK 5

How does the car's horsepower, MPG, and price vary across different Brands?

Task5

- Chevrolet
- Chrysler
- Dodge
- Ferrari
-

Insights

- Popularity varies significantly across different market categories, with luxury and performance cars generally being more popular.
- There is a positive correlation between engine power and price, indicating that higher horsepower often leads to a higher MSRP.
- Features such as engine power, market category, and brand significantly influence car prices.
- Average car prices vary widely among manufacturers, reflecting different market positioning and brand value.
- Fuel efficiency decreases as the number of cylinders increases, with a noticeable trade-off between performance and efficiency.
